

Outlook

- [Marking External E-mails](#)
- [Report Phishing and Junk](#)

Marking External E-mails

Outlook can mark emails from external sources with a note to make it easier to recognise spam and phishing threats.

It will look like this:

- **Outlook for Windows**
- [ExternalCallouts_Outlook.PNG](#)
- **Outlook on the Web**
- [ExternalCallouts_OWA.JPG](#)
- **Android**
- [ExternalCallouts_Android.JPG](#)

However, please do not rely completely on this labelling. For one thing, the technology can also make mistakes and it is always possible to take over a colleague's account.

If you would like this labelling, please contact us.

Report Phishing and Junk

Please inform us about phishing or junk.

This is how it works:

- **Outlook for Windows**
 - [Melden_Outlook.jpg](#)
- **Outlook on the Web**
 - [Melden_OWA.JPG](#)
- **Android**
 - [Melden_Android.jpg](#)

Important: If there is a targeted attack, please also inform us by telephone and e-mail. Targeted cases include, for example, addressing someone by their real name, referring to colleagues or special knowledge (e.g. from a post on social media, studying the homepage or an overheard conversation).
